The history of the ANCIENT ANCHOR goes back millennia. The most ancient anchors were probably rocks and date back to the STONE AGE. Many anchors made of stones, wood or metals ended in the depths of oceans, rivers and seas, however, the unique design of THE ANCIENT ANCHOR we use as logo was found in the ruins of a lost Greek civilization. It used pure mass to resist the forces of a storm or for permanent mooring, since moving such a massive rock to another bay is nearly impossible.

Our LEATHER BAGS and WALLETS represent the strength of the ANCIENT ANCHOR: Strength of Durability, Strength of Fineness of the leather, and the strength of Safety.
